NEW Best Management Practices Guide 2.0 - Available Spring 2007

This publication is designed to help growers identify and promote exceptional management practices, methods and procedures. Version 2.0 reflects the current practices, standards and a significant amount of knowledge gained since the original version was released in April of 1996 and contains two additional sections – Field Production and Nutrient Management. These management practices can be implemented regardless of nursery size or location and empowers container and field-grown plant producers to operate at a higher level of efficiency and effectiveness while implementing proactive management practices necessary to produce plants with minimal environmental impact. This BMP Guide has become recognized as the undisputed benchmark for horticultural BMPs in the U.S. with more than 4,000 copies of Version 1.0 in use today. **Version 2.0 will be available in the summer of 2007.**
